ARCHITECT ASHOK KUMAR

Over a period of long-long years we as architect have been noticing the action of salt peter on wall face and bricks in general which was on account of the type of soil condition. But lately, after constant efforts of ROYAL GUARDS they have developed a product SALT-O-SEAL which they claim to be containing the chemicals good enough to root out presence of excessive contents of undesirable foreign matter.

It is a matter of great pleasure that such as item is available in the trade which can offer the best solutions to such cronic problems. And, we hope such an endeavour shall bring about good results in the field of salt peter treatment.

We wish them a success.
